R Markdown

This is an R Markdown poster based on 'reveal.js' presentations. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word documents. For more details on using R Markdown see http://rmarkdown.rstudio.com.

When you click the **Knit** button a document will be generated that includes both content as well as the output of any embedded R code chunks within the document. Customize the poster.css file (or whatever it is renamed) to define the style and layout of the poster. See https://github.com/bbucior/drposter/blob/master/inst/example/poster.Rmd for an example.

## Slide with Bullets

- Bullet 1
